

VISION AND MISSION STATEMENT

VISION 2012

Consolidate and expand our business in Colombia offering a wider and more competitive range of products and services.

MISSION

Offer our customers high quality products and services in order to improve their quality of life. To achieve this, we have a qualified dynamic and committed team with the company.

CORE VALUES

- Constant updates
- Teamwork
- Consistency
- Discipline
- Optimism

AT PRESENT

We are in the process of implementation and certification of management systems and quality assurance (QMS) according to ISO 9001:2008

We are currently doing the following activities:

- Recent development of documented procedures.
- Implementation of activities described in the documents.
- Generation of records and evidence of implementation.

PRODUCTS AND SERVICES

RP Dental has been a leader company in the provision of supporting services and tools in surgery. For maxillofacial and orthopedic we have the following suppliers:

- Mondeal, a Germany company, which is our main supplier for maxillofacial surgery, osseous distraction, hand, distal radio and foot surgeries. They also provide us the Lomas and Benefit systems.

In the same way, we have titanium splints, pins and everything related with intraoral anchorage.

- Samo, an Italian supplier for joint (hip-knee) replacement surgeries.

For dental implants, we have two different providers:

- Mozo Grau, a Spanish company, which manufactures dental implants with tapered shape and different Connections (internal –external) and a full range of diameters in their platforms and their lengths.
- Biolok, an American company, which manages dental implants straight and helical external connection. This supplier also offers the collagen membranes.

For Ophthalmic Viscosurgical Device in anterior and posterior segment surgical procedures of the eye, we have:

- An Austrian company, Megacrom. They provide us a solution of intraocular use.

Others suppliers:

- Osteomed, an American company that specializes in small bone reconstruction and trauma. These suppliers give us neurosurgery systems, osteogenic distractors and cannulated screw system, mainly.
- Waston, which is a joint venture between China and Japan. With them, we offer alternatives in the area of orthopedics for joint replacements of long bones.
- DME 3D, a Colombian company, its aims is to provide specialist advice with advanced technological alternatives for the diagnosis and treatment of special clinical cases, by using specific anatomical biomodels replication.
